PROFESSIONAL SUMMARY

Managed and led multiple events and hackathons for a college club, with a focus on web development and emerging Web3 technologies. Spearheaded project development, coordinated teams, and enhanced participant engagement. Actively collaborated with stakeholders to deliver high-quality events and maintained detailed documentation for future reference. Passionate about integrating Web3 concepts into web development projects and exploring innovative solutions in the digital space.

EXPERIENCE

Member, CodeKrafters.
- Present

- **Led Event Coordination:** Successfully coordinated and managed multiple large-scale events, including hackathons, workshops, and seminars, ensuring smooth execution and high participant satisfaction.
- **Documentation and Reporting:** Maintained comprehensive documentation of all events, including planning details, budgets, and outcomes, which contributed to the club's knowledge base for future events.

EDUCATION

Velammal Vidyalaya Hr.Sec.Schools
10th & 12th

SRM Institute Of Science & Technology
B.Tech CSE | GPA: 9.55 / 10

PROJECTS

Weather API

- Integrated a Weather API to provide real-time weather data for any location.
- Designed a clean, user-friendly interface to display current conditions, forecasts, and weather icons.

Blog App

- Developed a responsive blog application using ReactJS for the frontend, providing a seamless user experience.
- Optimized the application for performance and SEO, ensuring fast load times and better search engine visibility.

E-Commerce Website

- Developed a fully functional e-commerce website using ReactJS for the frontend and Node.js for the backend.
- Implemented dynamic product listings with detailed descriptions, images, and real-time price updates.
- Created a shopping cart feature that allows users to add, remove, and modify item quantities, with automatic price calculations.
